If there is freedom of all, there is socialism.

Noted, capitalism is a worldwide society, thereby, replacement of capitalism by socialism is also a global society. Certainly, the consequence of capitalist antagonism that is outcome of contradiction of sellers and buyers of labour power of the world is socialism. Thus, only working

class will conquer the socialism by a socialist revolution which is neither local nor national but a universal event. So, socialism is not possible in one country alone.

But, there are so many stories about socialism at USSR and other Leninist states including China, Vietnam etc.

No doubt, the USSR, established by a military coup by the Bolshevik Party- founded and led by Lenin and Leninist bosses, including Trotsky, Stalin was full with capitalist mode of production and capitalist character by producing commodity to accumulate capital by exploiting the wage slaves, thus, it was a state of state capitalism. State capitalism is capitalism.

So, there was no socialism.

Therefore, stories about socialism at USSR and other Leninist states are nothing but fabricated intentional political propaganda, thus, all these stories about socialism are false, bogus and lie so, stories of socialism at USSR and other Leninist states are not history but myth.

**N: B: -**

(1) Capitalist society, currently ruled by the IMF, based on private property has inherited so many nonsense and rubbishes from the pre-capitalist societies those were also based on private property.

The capitalist society has defeated the all earlier societies to win and develop the capitalism and the capitalist society but

the capitalist society has become old before, the Communist Manifesto has public.

So, there are so many things what I mentioned as the character of capitalism was existing in the pre-capitalist societies too. But, that does not mean that there is feudalism or half or Sami feudalism in the old age of capitalism. Sure, capitalism is in moribund condition thereby, the disabled capitalist class is so reactionary, thus they are suffering from insanity by the over pressure of over load of over production that is recession and recession - the non-curable disease of capitalism ; And

(2) Right of inheritance has introduced by the masters to protect the private property by the legitimate inheritance. Capitalism is also for the right of inheritance for the same reason. But, all such nonsense rubbishes –originated from the private property will vanish by the vanishing of private property by the communist revolution by the working class by the ownership of means of production by society and that is socialism.

So, socialism is free from all such nonsense rubbishes – originated from private property including state, the IMF-the protector of defunct and dead states etc.
