

# CAPITALISM

**Capitalism is a global society of numerous commodities with a world market, based on selling and buying , wage slavery, class etc but rooted on private property.**

**Capitalism is a modern society of capitalist production system- a system but is marked from the outset by two peculiar traits as are: (1) It produces its products as commodities; And (2) The production of surplus-value as the direct aim and determining incentive of production.**

**Capitalism is a society of modern industry with a motto to produce commodity to accumulate capital- the unpaid labor.**

**Capitalism is an exploitative society but has sprouted from the ruins of feudal society- the second exploitative society in the history but a nature dependent, self-dependent, local and so poor economy with a parasitic ruling class- the feudal lords.**

**Capitalism is a society of prosperity and abundance but there is poverty – an artificial creation of the capitalist class – the rich class of capitalism. So, there is poor because there is rich in capitalism thus, there is division, disparity and discrimination among the human being even by sex because of class, class division and class rule because of private property, introduced by the brutal masters of the brutal slavery society- the first class divided society in the history.**

**Capitalism is a society of selling and buying thus, no one can live without money to buy the required**

**commodities in capitalism.** Therefore, everyone is moving and running behind the money to catch it for buying maximum commodities to use and consume but the capitalists are moving and running for hunting money by anyhow to increase the volume of money of them by following the rules of capitalism even by taking the risk to lose life for accumulating capital by the existence conditions of capital to exist as a capitalist.

**Sure,** consumption and use of some things are necessary to live but, a life of a human being is not for only eating or consuming and using the commodities to live for the same reason by hunting money to live for hunting money as a money plant but the **greedy and one-eyed capitalists are making their lives as a money plant by moving and running behind money by creating miseries and sufferings of so**

**many persons, mainly the exploited wage slaves.**

**Capitalism is a modern society with a ruling class- the exploiter capitalist class -the slave of capital-the dead labor but capital is not only personal but a social power. In fact, capital is the master of the capitalist slaves. Therefore, capitalism is ruled by the capital practically. Thus, capitalism is a modern and global society but ruled by the capital – the mightiest power in capitalism. So, the exploiter capitalist class have nothing to do except following the policies made by the political servants of the capitalist interest by following and caring the existence conditions of capital to exist as capitalist.**

**Capitalism is a society with an exploited, oppressed and ruled class- the working class – the product of the**

**capitalist class but the producer of capital- the unpaid part of a commodity. Noted, a commodity have 2 elements as are : (1) Natural resource ; And (2) labor. But natural resources have use value but not exchange thus, the exchange value of a commodity is labor what is consolidated in a commodity by the wage slaves. But, no wage slave can sale his labor but the wage slaves are selling their labor power to produce commodity to accumulate capital and the capitalists are the buyer of labor power of the wage slaves by paying wage – the price of labor power to produce commodity to accumulate capital. Sure, wage- the price of labor power is nothing but the production cost of labor power. So, the capitalists are not paying for labor -the action of labor power what the wage slaves are assembling and consolidating in a**

**commodity in their workplace by starting their action to produce commodity, in fact, no one have scope to buy and sale the labor thus, no capitalist is paying for labor, but the buyers of labor power of the wage slaves are the owner of commodities, produced by the wage slaves by receiving wage, paid by the buyers of labor power to the wage slaves to produce commodity to accumulate capital and thereby the capitalists are getting the price of a commodity by selling it without paying for labor – the one of the 2 elements of a commodity.**

**Therefore, the result of subtraction of the total production cost of a commodity from its price is capital for what the said capitalist did not pay thus, the capital is nothing but the unpaid labor or the surplus-value**

**what the wage slaves are producing in their surplus-time after producing the same value what the wage slaves are receiving as wage from the buyers of labor power for producing a commodity thus, wage is a fraction of the value of a commodity what the wage slaves are producing in a time of their whole working period thus the buyers of labor power of the wage slaves are paying for a part of a commodity, produce by the wage slaves but the buyers are getting the total value of a commodity by paying for a part of the value of a commodity therefore, the rest value that is the unpaid part of a commodity is capital, owning by the capitalists so, capital is nothing but the unpaid part of a commodity thus, capital is nothing but the fruit of exploitation of the exploited wage slaves and thereby, the capitalists are exploiter.**

**Capitalism is a society of numerous commodities , produce by the working class but the owner of all commodities is the capitalist class which is totally unfair, unjustified and illogical though legal by the law made by the rulers– the political servants of the exploiter capitalist class thus, the capitalism is not only unfair and unjustified but a self-contradictory society so, the basis of capitalism is totally unfair, unjustified and self-contradiction. So, capitalism is a society of exploitation, looting, theft, robbery, hijacking, corruption, bribery, lie, cheating, forgery, occupation and eviction, killing, cruelty, violence, rape, crime, punishment, quarrel and conflict with arms , and many more nonsense in fact, capitalism is a war prone society with a war -war situation.**

**Capitalism is a society with class contradiction and class struggle by birth condition of capital- the fruit of exploitation. Noted, the relation between the exploiter capitalist class and the exploited working class is antagonistic by birth condition of capital – the unpaid part of the commodity therefore, there is constant contradiction between the capitalist class and the working class thus, the capitalist class and the working class are standing face to face by the illogical, unfair and unjustified ownership of commodity – an object with use and exchange value by the capitalist class but, produced by the working class.**

**Noted, the outcome of the contradiction of the both matured capitalist class and working class is communism- a scientific society of**

**equals, free from commodity, wage slavery, selling and buying, exploitation, capital, class and class rule , by ending politics, political party, political organizations including state- a big bundle of huge chains to chain to oppress and overpowering the exploited classes thus, the state is nothing but the strongest oppressive machine of the exploiter ruling classes by birth condition of state, originated from the private property to serve the interest of the private property holders to protect the private property, based on social/common ownership of means of production, transportation and communication to coordinate and communicate all required information and social products by the all able bodied for all of the world.**

**Capitalism is the producer of all required conditions along with force-**

**the working class – the grave digger of the capitalist class- the parasitic but the unnecessary class of the old capitalist society for abolition of capitalism. In fact, working class is the only revolutionary class to replace capitalism by communist revolution – the ever biggest, ever important and ever impacted event of the world by the existence conditions of capital and the existing conditions of the capitalist class but imposed by the capitalist class- a reactionary class thus, its not ready to accept its final destination by abolishing it by abolishing capitalist property by communism- the new society but will work to win nature to use best for the best welfare of all of the world commonly.**

**Capitalism is a class divided society but it's the last and final class divided societyo replace capitalism by communist revolution. Because, capital**

is the cause of disappearance of both capital and capitalism and thereby, existing classes including working class will disappear.

**Capitalism is the foundation of communism-** a most modern society with a single one and undivided mankind with full sense of humanity- a sense of feeling for the whole mankind.

**Capitalism is developed globally by the revolutionary capitalist class by the existence conditions of capital as are : (1) Reproduction : And (2) Circulation and thereby following colonial policy- the integral part of capitalist development but its lost its importance and utility when the capitalism has become old thus, the colonial policy has concluded by the winner of the 2nd world war– the political servants of the disabled and reactionary capitalist class for ending the**

**2nd world war for exercising the free market economy that is the free movement of commodity and capital globally by practicing the policy and politics of capitalist globalization by forming some global organizations for reducing the colonial barriers of market for avoiding war by avoiding recession. Noted, the cause of first and second world war was the great recession – the non-curable but unavoidable disease of capitalism by the existence conditions of capital and the existing condition of the capitalist class – the constant revolutionizing of the instruments of production.**

**Capitalism is a modern industrial society and thereby it has introduced and developed with :**

**(1)A world market ; (2) Modern transport and communication system ; (3) Financial and Banking system ; (4) Capitalist**

**culture- a culture of selling and buying globally; (5) Formation of Stock companies - An enormous expansion of the scale of production and enterprises, which were impossible for individual capitals and thereby capital rests on a socialized mode of production and presupposes a social concentration of means of production and labor-powers, is here directly endowed with the form of social capital therefore it is the abolition of capital as private property within the boundaries of capitalist production. In fact, it's the introduction of social ownership by indicating the limitation and reduction of private property and thereby, it has determined and confirmed the uselessness and unnecessary of the exploiter capitalist class; (6) Modern education system to produce human tools for the capitalist system to keep moving it; (7) Modern science and technology: (Democracy- a political system with a modern state along with a representative**

**government , elected by the voters by ignoring, denying and deposing the divine right holders by denying the divine right by introducing secularism – an integral policy of democracy; (9) Modern Jurisprudence; (10) Political party; (11) Modern media; (12) Mass destruction weapons including virus weapon (13) Recession –the outcome of reproduction - the epidemic of over production – the revolt of the productive forces against modern conditions of production, and against the capitalist property relation; (14) World war; (15) Global organizations for making and implanting the socio-economic policies including tax and tariff by caring the politics of capitalist globalization by making sure the defunct condition of state thus, nation state is dead and thereby democracy is dead ; (16) The scientific concept of equality of men with men by creating division of labor to produce commodity by the social labor by reducing the**

personal worth by making sure the equal importance of workers to produce a commodity to accumulate capital and thereby workers are inter-dependent to produce commodity in capitalist mode of production; (17) Science of Communism, discovered by Communist Marx by discovering the code of capital and the code of society for change, and it explained by Engels too; (18) Reintroduction of fanaticism, fundamentalism etc. dirty political concept of the brutal rulers of the brutal slavery society what they have introduced for creating violent atmosphere in the society to exist as the rulers – the political servant of the exploiter ruling class of the slavery society by enjoying the total and absolute obedience and subjugation from the subjects and slaves for reintroducing and spreading the concept of servility by ignoring, denying and abandoning the democratic sense, values and politics by confirming the dead condition of

democracy for making sure the defunct condition of states but so expert for oppressing and overpowering the exploited working class as the fascist state- the latest form but the evaluation of the ultimate condition of state what was the condition of states of the full grown capitalist society or old capitalism but currently capitalism is in moribund condition. **Noted**, state - the strongest oppressive machine of the exploiter ruling class, originated from the private property but if there is no private property , there is no utility of state and thereby communism- the historical consequence of capitalism is a modern society without private property thus, communism is a stateless society based on social ownership of property; (19) Reintroduction of various customs, cultures including Pyramid culture etc harmful , shameful, mythological and unscientific but effective to ignore and deny the dignity of men as a member of

**the mankind introduced by the cruel and killer rulers of the both slavery and feudal society; And (20) Conceived the whole capitalist class- a disabled and reactionary class by the heinous political concept of extreme violence along with craziness, madness and insanity by repeated failure and disability to rule the society by the huge and heavy load and pressure by the repeated recession by the existence conditions of capital.**

**Sure, the beneficiary of the capitalist development is the exploiter capitalist class– the parasitic class of capitalism, which is totally unfair and unjustified but legal by the law made by the rulers – the political servant of the capitalist interest. Therefore, the exploited working class is deprived from the capitalist development though the working class is the producer of all commodities. But, no one can buy any**

**commodity to use and consume without money in capitalism- a society of selling and buying, based on wage slavery. Noted, workers are also seller of their labor power- the commodity of the wage slaves by receiving wage – the production cost of labor power.**

**Capitalism is a modern society based on capitalist property– a self-contradictory ownership of property therefore, the abolition of capitalist property is an unavoidable condition to develop the society scientifically by the compatible ownership of property by the social ownership of property – the means of production and of exchange for proper utilization of the modern instruments of production to solve the all existing problems, originated from the existing self-contradictory ownership of property.**

**Capitalism is a modern society and thereby, its producing the new and newer**

**instruments of production to produce new and newer commodities but the conditions of capitalist society are too narrow to comprise the commodities thus, there is recession – the unavoidable but non-curable disease of capitalism which is the cause of anarchy in capitalist system along with labor unrest, political unrest and many more along with even war- the organized killing, rape, destruction, arson, plundering, occupy and eviction etc and thereby, some capitalists are losing their private property by the recession thus, the result of repeated recession is social ownership of means of production, transportation and communication ,won by the working class. So, **fall of capitalism and the emergence of communism is equally inevitable.** Therefore, capitalism is the foundation of communism- a scientific society of equals with a single one and undivided mankind with full sense of humanity along with a world association**

**of all by the all for the all of the world to coordinate and communicate the information and the production of all social products for all of the world by the all able bodied- the free development of each is the condition for free development of all. Therefore, communism- the historical consequence of capitalism is a society of liberty and freedom of all of the world.**

**Capitalism is a society of uneven competition of capitalists too because, all capitalists are not the owner of equal property thus, capitalism is not a level playing field for a free, fair and equally competition for all capitalists for the market to sale their commodities because, capitalism is a society based on private property. Rather, a capitalist can kill and destroy so many capitalists to exist as a capitalist. So, even every capitalist is**

**in risk and fear in market for losing his property what the capitalists are holding illogically thus, none of them are free from anxiety and uncertainty so, capitalism is a society of certainty of uncertainty thus, no one is safe and secure in capitalism- a waste and dirty society. In fact, capitalists are suffering from depression – a phobia frequently and the fruit of repeated depression of a man is insanity, suicide, schizophrenia etc capitalist disease.**

**Capitalism is a society of uncountable problems by the existence conditions of capital and the existing conditions of the capitalist class thus, there is no scope to solve the problems of capitalism in capitalism. So, only the option for solving the capitalist problems is disappearing the capital by overthrowing the exploiter capitalist class in the air**

forever by vanishing the capitalist property by the social ownership by the communist revolution by the working class alone. Therefore, nothing except the communist revolution- the culmination of contradiction of the exploiter capitalist class and the working class is the only option for the emancipation from all chains created by the capitalist class to protect the capitalist property, originated from the private property for solving all capitalist crisis and problems.

Capitalism is a society based on private property but the capitalist production system is gradually compressing the private ownership by concentrating capital by creating so many joint companies, stock market, statization of property etc by proving the limitation of private property for its unnecessary for widening the road for social ownership of property by confirming the unnecessary of the

**exploiter capitalist class-** the ruling class of capitalism. So, communism- a society based on social ownership of property is the outcome of capitalist but self-contradictory ownership of property thus, capitalism is the foundation of communism so, communism is inevitable and unavoidable thus, **so, such reactionary job of any reactionary will be a futile job but harmful for the mankind though capitalism is yet existing because, the workers of the world are not united to replace it by the communist revolution- the ever biggest, ever important and ever impacted event of the world for communism.**

**Capitalism is a society of class struggle against the exploiter capitalist class by the exploited working class by birth condition of capital logically. The outcome of this logical class struggle of the working class is communism- a most modern**

**society free from class and class rule thus, there is no ruler to rule anyone to restrict anyone to do anything or to compel for not doing anything what a man like to do even love and union. So. Communism – the replacement of capitalism is a lovely and friendly society of all thus, it's a society of liberty and freedom.**

**Capitalism is a society which was a historical necessity by following the code of society for change but not fair but, the historical consequence of non-fair capitalism is a fair and peaceful society because, there is no private property , no class, no class rule, no class division, no discrimination among the mankind , no conflict of interest , no quarrel, no war and war force along with war weapon, no ideology, no philosophy, no creed, no politics, no political organization, no state, no ruler, no guide, no cult, no preceptor , no hero but everyone is equally treated by everyone by the fellow feeling – a**

**humanitarian feeling for all of the world. Therefore, the mankind will be human being with full sense of humanity in real sense in the first time in history in communism.**

**Capitalism is the producer, source and store of all required information for the working class for working scientifically for vanishing capitalism.**

**Capitalism is a modern society based on private property but started its journey with negation of private property and finally it will complete its journey by vanishing private property by negation of negation of private property by the concentration of capital by some global syndicates by some newest instruments of capitalist production by the existing condition of the capitalist class and**

**the existence conditions of capital by the socialization of property.**

**Capitalism it-self is the cause of non-existence of capitalism.**

**Capitalism is the birth place of communism- a global but scientific society, won by the working class alone by the communist revolution- the inevitable and unavoidable event of capitalism imposed by the capitalist class by abolishing capitalism but, communism is the place of developing communism from communism. So, capitalism will disappear.**
