and friends so, everyone is a human being by reducing the political identity of everyone even by sex as man, woman and eunuch determined by the political bosses of the slavery society. Noted, women are not the sexual object of men for fruition as the reproductive machine or a fucking doll to enjoy by male for pleasure but yet treated.

A party to unite the workers of the world for the communist revolution- the culmination of the contradiction of the exploiter capitalist class and the exploited working class for the emancipation by abolishing the exploitative capitalist mode of production to end the class and class rule by vanishing the classes. communism- a society free from capital-the fruit of exploitation.

36. A party to work to replace the capitalist society – a global society currently ruled by some global organizations including IMF-the controller of the world economy but failed , founded by the winners of the 2nd world war including Leninist big boss J.V. technology along with a scientific information system by abolishing the current education system. Therefore, the communist revolution will vanish all global organizations including IMF, founded by the capitalist class for the capitalist interest. 53. A party to work to vanish all types of servility by the communist revolution – the most radical rupture with traditional relations and traditional ideas.

54. A party of best hope for the best future of all.

55. A party will be abolished by itself to fulfill its aims and objects

by the communist revolution by the working class alone by creating all necessary conditions to form a world association of all by all for all of the world which is the condition for the free development of all.

Noted, there are so many parties are claiming that they are communist party by naming them as communist, socialist, revolutionary socialist, workers party, revolutionary democratic party, etc & etc but none of them are working to unite the workers of the world to fight against the exploiter capitalist class to vanish it by vanishing capitalist mode of production for vanishing wage

slavery , selling and buying, capital etc to end exploitation of men by men to end class and class rule along with all oppressive weapons including state , political party etc of the exploiter ruling class for the emancipation . Thus, none of them are working for the same end what mentioned above. So, there is no communist party in this world.

Furthermore, not only communist party but also there is no communist movement since 1896 in this world by adopting the politics of so-called right of self-determination of nations by the 2nd International in its London congress which was formed with a

commitment to work for the same aim what was the aim and object of the 1st International- a global organization of workers of the world to unite the workers of the world for the communist revolution by the working class alone to replace the old capitalism by communism for the emancipation. But, the politics of the right of self-determination of nations by opposing the colonial policy to defeat the colonial rulers is useful to divide the workers of the world and confined them by nation and country though workers have no nation and country but they have a world to win by losing their chain by

vanishing the capitalist mode of production by the communist revolution-the ever biggest, ever important and ever impacted event of the world to forcible overthrow of all existing social conditions by the working class alone. Therefore, unity of workers of the world is the first condition for the emancipation. But, the politics of the said national liberation is totally against the unity of the workers of the world to overthrow the capitalist class in the air by the communist revolution rather, its for the development of so-called national economy by founding a state by defeating the colonial rulers but

not fighting against the capitalist system to vanish it with the exploiter capitalist class as a whole and its all oppressive weapons. Thus, the politics of national liberation is helpful to save and protect the decayed capitalism even by ignoring the class identity of both capitalist class and working class. So, such politics of so-called national liberation, acknowledged by the 2nd International is so harmful and dangerous for the working class but effective to hide and grounded the communist movement- a movement of workers of the world for the emancipation.

In fact, the official leaders of the 2nd International betrayed with the working class to serve the capitalist interest by protecting the decayed capitalism. Finally, the 2nd International was dissolved by following the same politics of division of the world by nation and separating the parties by countries. Though, Lenin and Trotsky has founded a global organization by claiming it 3rd International by acknowledging the politics of national liberation and the politics of state capitalism for strengthening their political power to protect the state, headed by Lenin founded by a planned military coup at night by taking

the advantage of the first world war by the Bolshevik party- a reactionary capitalist party by its founding declaration, but claimed the said event to capture the state power of Russia as socialist revolution which is totally false and bogus but an intentional lie and ill-motivated political propaganda to confuse the workers of the world even about the socialist revolution- the culmination of contradiction of the exploiter capitalist class and the exploited working class to create misunderstanding about socialism- the outcome of the contradiction of the capitalist class and working class thus,

socialism is the replacement of capitalism along with social ownership of means of production, transportation and communication along with an association of all for all and by all of the world which is free from commodity, capital, wage slavery, exploitation, etc thus, socialism/communism is free from class and class rule, division, discrimination etc among the human being but it's not possible in one country alone.

Yet the moribund capitalism is existing because, the workers of the world are not united to vanish it by the communist revolution. But, it's so necessary to replace

the so-old capitalism along with a so reactionary but most expensive and ferocious capitalist class for the emancipation. In fact, there is no option except replacing the capitalism – a poisonous and so-bad smelled rubbish by communism to live with free breath by all of the society. But, a communist party is an unavoidable condition to unite the workers of the world for the communist revolution for communism by vanishing the so poisonous and so wasted capitalism based on commodity, capital, selling and buying, exploitation etc but rooted on private property- a legal by the

law of exploiter capitalist class but unjustified and unfair thing.

So, a communist party is a historical necessity to unite the workers of the world for the communist revolution for the emancipation.
