A communist is a scientist to know science, to realize science , to care science and to practice science for a

class to communicate the facts about
science specially science of
communism discovered by

capital and the code of society for
change.**

A communist is a friend of working class is sharing and discussing the facts about: Science and scientific development; History of societies, classes, class division, class rule and class struggle; Mythology, ideology, philosophy, idealism, creed, politics- the supreme policy of all evil polices and political organizations including state- a big bundle of huge chains to chain men by men to rule men by men by overpowering and oppressing along with capital punishment and thereby, state is the strongest oppressive machine of the exploiter ruling classes; And Capital and capitalism along with historical consequence of capitalism- the last and final exploitative and class divided society by fall of capitalism- the foundation of communism by

communism- sweet fruit of poisonous capitalist tree , with workers of the world for the unity of the workers of the world for the communist revolution- the culmination of contradiction of the exploiter capitalist class and the exploited working class for the emancipation of the working class by emancipating the whole society by conquering communism- a classless and stateless society. Noted, the relation of the capitalist class –the exploiter ruling class of capitalism and the exploited working class- the producer of capital is antagonistic by birth condition of capital- the fruit of capitalist exploitation.

A communist is a communist worker to work to unite the workers of the

world by a working class party for the communist revolution to replace capitalism by communism.

Noted, idea and concept of communism and finally the science of communism is discovered and originated from the commodity production system where no one can claim that he is the producer of a commodity independently rather, every worker is not only inter-dependent but all concern workers are in a cooperative relation for

producing a commodity and thereby it is proved in capitalist society that has sprouted from the ruins of feudalism that labor is egalitarian. Thus, it is proved that men are equal even by birth elements too but there is division and discrimination among the human being because of capitalist property. Therefore, a scientific view for abolition of capitalist property for vanishing all kinds of division and discrimination among the human being has originated and emerged as a historical necessity in capitalism. Thereby, the stream of communism is the progressive and revolutionary stream in capitalism, currently in moribund condition thus, fall of capitalism and the emergence of communism is equally inevitable and unavoidable by the code of society for

change. So, he who is with the communist stream by working for unity of the workers of the world for the communist revolution for communism is a communist.
