

# ICWF is for the Science of Communism Discovered by Marx

Information Centre For Workers Freedom is for the science of communism discovered by Marx.

But, not because of that Marx was an extra-ordinary or great leader or messenger or universal reformer rather, he was a communist and he worked for communism- the replacement of capitalism- a global society conquered by the revolutionary capitalist class by following and practicing the colonial policy – an integral policy of capitalist development by the existing conditions of capital-(1) Reproduction; And (2)

**Circulation but, the last and final class divided society.**

**Communism- the historical consequence of capitalism- the modern society of numerous commodities with a world market has sprouted from the ruins of feudal society – a nature dependent, self-dependent and local but so poor economy is a scientific society of equals, won by the revolutionary working class thus, everyone is treated equally equal by everyone and all are scientist in communism- a scientific society of equals.**

**And thereby, communist Marx was a scientist and he discovered the science of communism by discovering the code of capital and the code of society for change and as a communist he was against all kinds of discrimination and disparity among the mankind for ending all these nonsense those are against equality.**

**Modern science is the byproduct of capitalist mode of production by the existing conditions of capital and the existing condition of the capitalist class – the ruling class of the exploitative capitalist society. Noted, the exploiter capitalist class cannot exist without constant revolutionizing the instruments of production by following and caring the rules of market- a place of uneven contest and competition for selling and buying the commodities.**

**Therefore, the revolutionary capitalist class had no choice or option except introducing science – the code of creation or formation or transformation or change of anything to exist as capitalist class thus, they were bound to know the code of nature and natural products and the elements for creation and change ; And invent the new and newer instruments of production and transportation to produce new and newer commodities to sale to**

**accumulate capital. Thereby, the said capitalist class has introduced the modern education system to produce human tools including scientists for the capitalist society to work it to accumulate capital.**

**Therefore, the unavoidable but inevitable effort of the capitalist class by the unavoidable compulsion of the capitalist class –the slave of capital by the rules of capitalist market for the capitalist development to protect the capitalist mode of production was the reason of development of science and scientific concepts to exist as the ruling capitalist class by proving the falsification of mythologies and thereby denying and rejecting the mythological concepts about the creation or origin of sun, earth, life, human being, family, society, ruler etc fabricated stories, produced by the selfish , sectarian and brutal rulers of the brutal and dark slavery society to justify their unjustified and unfair power of rule to**

**chain to rule and to oppress the exploited slaves and contenders to protect their sectarian interest to live a parasitic life by exploiting the slaves by determining the slaves as the private property of the masters of the slavery society- the first class divided society in the history of mankind.**

**In fact, mythologies are nothing but the ill motivated and intentional but fabricated political stories made by the brutal rulers of the slavery society – a local, self – dependent , nature dependent but so poor economy with a parasitic ruling class- the masters of the slaves but, they were totally unknown about the origin of the sun, earth, life, mankind, etc even they were totally unknown even about the diameter or the moving condition of the earth and they had no scope to know the anatomy but they said so many lies about all concern things including the origin of earth, life , mankind, family, political**

**power etc to justify their role to rule the society as the political bosses by claiming them as divine right holders therefore, mythological stories are the political statement of the rulers of the slavery society to serve the exploitative interest of the masters of slaves by creating political organizations including kingdom- the primary formation of state to oppress the exploited.**

**Slavery society was inevitable but not fair and logical therefore, rule of men by men was necessary to control and subjugate the slaves by the masters and thereby, politics- a bundle of intentional and fabricated lies made by the rulers of the slavery society was necessary to justify and receptivity of the unfair and unjustified private ownership of property and the ruling power of the masters to rule by creating false ideas, misconception and confusion among the slaves even**

**about their origin and existence to live for the masters.**

**In fact, politics, made by the rulers of the slavery society has started its journey as an effective drug to subconscious the slaves even about their aim and task of life to serve the masters along with full obedience even by losing their lives, if need for the interest of their masters by creating an emotional sense to impress , to hypnotize and to convince the slaves to protect their masters for the welfare of the slaves too for attaining a luxurious and comfortable life by the slaves too but not sure in earthly life.**

**Thus, the politics has started its mission to serve the sectarian interest of the parasitic masters by numbing the slaves to think to judge and compare the facts, described by the rulers or preceptors to believe or not rather, a politically convinced person, conceived by the**

**political concept of the fraud and cheater rulers of the slavery society became a man of faith but faith is blind and thereby, a faithful man can do any nonsense along with self-killing by following, fostering and caring his faith. In fact, such faithful man is a man of servility who cannot live without a master or guide thus, a man of political servility cannot lead his life without a leader.**

**Therefore, a master or preceptor or leader or guide is an important and essential character to a man of servility.**

**So, politics was the so effective weapon of the masters to oppress and overpowering the slaves and yet politics is so effective drug to create emotional sense to deny practical sense and situation by ignoring the science and scientific development to ask the question about all things even about capital-the mightiest powerful substance of the world and capitalist**

**class- the exploiter ruling class but currently disabled and reactionary by the moribund condition of capitalism thus, still politics – a product of the intentional and habitual liar and ferocious rulers of the brutal slavery society is a so effective weapon to confuse, to hypnotize, to deceive , to cheat and to subjugate the exploited wage slaves.**

**Therefore, political power is nothing but an organized power to oppress and overpowering thus, politics- a bundle of lies even about politics but effective weapons of the brutal, cruel, ugly, heinous and liar rulers, introduced by the brutal, violent and ferocious rulers of the brutal and dark slavery society is nothing but an artificial creation of the political bosses of the slavery society to chain, rule and oppress the men by men. No doubt, rule of men by men is the highest form of brutality and the denial of identity of the**

**mankind by dividing the man kind by ruling class and ruled.**

**So, politics has started its journey to justify exploitation of men by men – the extremely inferior work by determining the slaves as the private property of the exploiter masters by ignoring and denying the entity and standard of mankind because, no human being is property ; to justify the rule of men by men – the highest form of brutality by determining the rulers as an extraordinary and others are ordinary by ignoring the common standard and denying the identity of mankind because, everyone is equally equal even by birth condition because, everyone is from 23 pairs of chromosomes; to justify the classes, class division and class rule by ignoring and denying the origin of mankind ;to justify the discrimination, and disparity among the human being even by marking some are men and some are women and some are transgender by**

**naming some parts of the body as sexual part unscientifically even, without knowing endocrine system – the most important system even for reproduction by ignoring and denying the importance of other parts of body by the mentioned sexual parts by determining the role of a person by sex but intentionally and artificially to use women as the sexual object of men as the reproductive machine of husbands to produce legitimate inheritance to protect the private property by losing the identification of mankind as a whole is a mankind; And to justify the all evil jobs including ferocity, violence, killing, rape, lies etc of the rulers and ruling class to occupy and protecting the illogical, unfair and unjustified but harmful private property.**

**So, politics is nothing but the supreme policy of all evil policies. Therefore, politics is an artificial creation of the**

**exploiter ruling classes to serve and protect the interest of the exploiters by hypnotizing and confusing the exploited but it's originated from the private property. So, politics is an effective, useful and sharp weapon of the exploiter ruling classes by birth condition of it.**

**But communism is a scientific society of equals free from private property, exploitation, class and class rule by ending politics and political organizations including political party, state and all other exploitative organizations including IMF, WTO etc thus, everyone is equally treated by everyone in socialism therefore, there is no unscientific concept-idea, mythology, creed, ideology, philosophy, politics, etc in communism so, everyone is scientist in communism and thereby, communist Marx was not a philosopher or ideologist or politician but a scientist.**

**Therefore, communist and thereby scientist Marx worked for communism - a discrimination free society, which is the historical consequence of capitalism by the self-contradictory condition of capitalist ownership of property but won by the working class alone by knowing and realizing the fact scientifically that the abolition of capitalism and emergence of communism are equally inevitable and unavoidable by the existing conditions of capital-the dead labor. Thus, Marx was not only sure but also certainly sure and confirmed about the historical consequence of classes including working class by the non-existence of classes by communism- a classless society. So, communist Marx worked for communism so confidently.**

**Noted, capital cannot exist without reproduction and circulation. But, the outcome of reproduction is over production, and the effect of over production is stock that is recession, and**

**the result of recession is the disturbance of circulation thereby, there is anarchy and the outcome of such anarchy is the cause of loss of private ownership along with so many problems and crisis of capitalist class by labor and political unrest, riot, war and war- war situation, killing, bankruptcy , amalgamation of companies etc & etc.**

**Therefore, the consequence of recession - the non curable but unavoidable disease of capitalism by the existing conditions of capital is the contraction of private ownership of property and widening the avenue of the social ownership along with all required pillars.**

**Finally, the consequence of repeated recession is the social ownership of means of production, transportation and communication and that is socialism by abolishing the capitalist ownership of property by the communist revolution by**

**the working class alone by the existing conditions of capital- the surplus-value. So, capitalism is the last and final class divided society thus, capitalism is the foundation of communism- a humanitarian, lovely and friendly society of lovers and friends.**

**Therefore, the working class- a product of the capitalist class but the grave digger of the exploiter class will vanish both capital and capitalist system along with the reactionary capitalist class by the communist revolution, imposed by the reactionary and disabled capitalist class but done by the revolutionary working class by the existing conditions of capital and the existing condition of the capitalist class.**

**It's our pleasure that we the members of the ICWF are with working class-the only hope of best future for liberty and freedom of all of the world by vanishing**

**all chains, originated from the private property including state- a big bundle of huge chains for removing the all political borders of the world by playing a historical role to make sure the communist society by its global united action.**

**In fact, working class is the builder of the best future of the human being by the existing conditions of capital for its emancipation from the exploitation of capitalist exploiters; miseries, hardship, sufferings by the owner of the capitalist property: And all chains made by the brutal rulers to chain men to rule, oppress and overpowering. Thereby, the working class is not only and alone revolutionary class but also the emancipator of the whole mankind by emancipating the whole society for its own emancipation by conquering communism- a society of freedom and liberty of all of the world with a single one**

**and undivided mankind with full sense of humanity by removing all political identity of everyone even by sex. Noted, sexual identity of a person is nothing but a political identity. So, the identity of a person by sex is an artificial but no real or scientific thus, identity of a person is not only denial of entity of mankind but also shameful so, identity of a person by sex is against normal life and normal activities of him and thereby, identity of a person by sex is harmful and dangerous for the mankind.**

**So, ICWF is with the revolutionary working class – the advanced force of history to abolish capitalism to abolish all kinds of political identity even by sex for communism- a scientific society with a single one and undivided mankind.**

**Certainly sure, Marx and Engels both were for the communist revolution by the working class alone for communism - a global but most modern society.**

**The capitalist class is the exploiter of the working class by birth condition of capital-the fruit of exploitation. Thus, there is antagonism and contradiction between the exploiter capitalist class and the exploited working class by birth condition of capital. So, there is no option to solve the contradiction of the both classes except vanishing capital- the cause of contradiction of the capitalist class – the owner of capital by holding the capitalist ownership of property- the means of production and of exchange and the working class- the producer of capital but not owner of capital-the unpaid part of the commodity.**

**So, the contradiction of the capitalist class and the working class is a living and running affairs by birth condition of capital but that does not mean it that the said contradiction will remain forever. Rather, capitalism will face its final fate**

**by the same reason for what the previous 2 class divided societies are not existing now.**

**No doubt, communist revolution is the culmination of contradiction of the sellers and buyers of labor power of the world to produce commodity to accumulate capital. The communist revolution will end such contradiction by replacing the so waste capitalist society- based on selling and buying by the communist society, free from selling and buying thus, communist revolution is inevitable and unavoidable by the normal course of capitalist ownership because, there is contradiction between the buyers and sellers of labor power because, buyers of labor power are exploiter by paying wage to the sellers of labor power to produce commodity to accumulate capital and the sellers of labor power are exploited by producing the value, therefore, surplus-value that is capital-the unpaid labor but**

**receiving wage- the price of labor power-  
the production cost of it.**

**Noted, natural resource – one of the 2  
elements of a commodity have use value  
but it has no exchange value thus, the  
price of a commodity is labor- the another  
element of the commodity.**

**So, capital-the unpaid part of a  
commodity that is the unpaid labor is the  
production of the exploited wage slaves  
but the owner of capital is the capitalist  
class which is totally unfair and  
unjustified though legal by the law of  
exploiters made by the rulers of the  
unfair capitalist society.**

**The relation between the exploiters and  
exploited is antagonistic thus,  
contradiction between the exploiter  
capitalist class and the exploited working  
class is quite natural by birth condition of  
capital- the dead labor. So, the communist**

**revolution is inevitable and unavoidable by birth condition of capital but the communist revolution is not possible in one country alone because, capitalism is neither a local nor national but a global society thus, the replacement of global capitalism is not possible in one country alone so, socialism/ communism- the replacement of capitalism is not possible in one country alone therefore, the range of communist revolution- the ever biggest , ever important and ever impacted event of the world to replace global capitalism is neither local nor national but universal.**

**Noted, capitalism is a worldwide system introduced by the revolutionary capitalist class by conquering the unknown world by practicing the colonial policy-the integral policy of the capitalist development by creating a world market by replacing the self-dependent but so poor and backward local economic**

**system by defeating the rulers of the said pre-capitalist societies.**

**Sure, the colonial policy was the integral condition for the development of capitalism by the above mentioned existing conditions of capital. Therefore, the colonial policy was the progressive policy of the revolutionary capitalist class. But, now capitalism is in moribund condition by the existing conditions of capital, under the rule of some global syndicates including the IMF by practicing the politics of capitalist globalization to protect the moribund capitalism by controlling the world economy from a single one global centre- the IMF to avoid the recession, but the IMF is failed to avoid recession.**

**Therefore, the colonial policy has lost its utility after the full grown condition of capitalism and thereby the politics of capitalist globalization is the policy of the**

**disabled capitalist class by making sure the defunct condition of states under the rule of said global organizations by making sure the dead condition of democracy- the political system of capitalism , introduced by the revolutionary capitalist class along with secularism-the integral political policy of democracy to defeat the politics of the divine right holders – the rulers, masters and lords-the beneficiaries of the pre-capitalist societies.**

**Thus, currently the reactionary capitalist class is practicing the fascist and fanatic politics by taking shelter to the politics of pre-capitalist societies and thereby the disabled capitalist class is staying in the hole of history but suffering from the non curable capitalist disease – the recession – the heavy pressure of huge load of huge stock of huge commodities repeatedly so, the disabled capitalist class as a whole is suffering from the insanity and thereby,**

**there is fascism, extremism, terrorism, anarchy etc more or less all over the world thus, the exploiter capitalist class is much more ferocious and violent then the past.**

**But, the so heinous and brutal capitalist class is yet able to confuse and divide the workers of the world by conceiving the politics of various politicians including Lenin- a gang leader of the exploiters but the key founder of the USSR- a state of state capitalism by a planed military coup at night. Therefore, the workers of the world are not unified to fight against the said so reactionary capitalist class to over throw it in the air to vanish capitalist ownership of property for the emancipation of the working class by emancipating the whole society by the communist revolution-a forceful action of the working class alone.**

**Even, the working class is not considering for vanishing the exploiter capitalist class by vanishing the capitalist ownership of property- the cause of all miseries, sufferings, hardship etc of the exploited working class for its emancipation by emancipating the whole society by considering the science of communism. Rather, a fraction of the working class is still conceived by not only the politics of the slavery society but also the politics of the poisonous Leninism - the corruption of science of communism but the politics of so-called national liberation and state capitalism. But, these politics are so effective to divide the workers of the world by country, by nation , by ethnicity, by race, by sex, by creed etc and etc; And so useful to deny the class identity of the working class to ignore the class interest of it. So, Leninism is so helpful to ignore and deny the class struggle of the exploited working class against the exploiter capitalist class.**

**But, the disciples of liar Lenin- a gang leader of the exploiters as Lenin was the chief buyer of labor power of the wage slaves of his state to produce commodity to accumulate capital- the fruit of exploitation as he was the chief executive of his state- a state of state capitalism – a waste form of so waste capitalism but Lenin claimed it socialism which is totally lie, false and bogus but an intentional political propaganda to confuse the workers about the socialism and socialist revolution to protect the decayed capitalism yet are shouting that they are for socialism even after fall of USSR and other claimed socialist states to divide the workers of the world by nation and country. But, they are claiming them Marxist by marking and undermining Communist Marx as a producer of the so-called Marxism by ignoring and denying the science of communism, discovered by the scientist Marx and identifying Marx**

**as a great ideologist, philosopher and an extra-ordinary man by conceiving the political concept of the brutal rulers of the brutal slavery society but intentional liars by the professional cause. Noted, politics is the profession of the political rulers- a combination of the cruel and dirty men in character.**

**Moreover, Leninists are claiming that the Leninism is the development of Marxism but sorry, no Leninist is yet mentioned the name of book where Marx has described the said Marxism and what was finally developed by Lenin- the producer of Leninism as Leninism. Even, no Leninist does feel shame to say that the USSR was the brain child of Lenin by claiming Lenin as a great Marxist.**

**The code of water is H<sub>2</sub>O. Therefore, not ideology but the said code of water is science. The unpaid labor is capital and it's the code of capital, discovered by**

**Marx. Therefore, not an ideologist but Marx was scientist by discovering the science of communism by discovering the code of capital and the code of society for change. So, Leninists are totally liar about scientist Marx and his discovery.**

**No scientist can produce anything from his brain. Sure, brain is the only organ to think and decide but not independently but the existing conditions of the society is the determining factor for thinking of everyone. However, capitalism- a modern society is the producer of so many scientists and science and technology along with ICT by the existing conditions of capital and the existing condition of the capitalist class what are already mentioned earlier.**

**But, the exploiter capitalist class is using the science to produce commodity to accumulate capital by selling commodities in the market to gain the sectarian**

interest of it and to manage and protect capitalism- a society of uncountable commodities, based on private property thus, the capitalists are chained by the sectarian interest of the capitalist property and thereby, the capitalist class as a whole is blind to their petty interest thus, they are one eyed so, they are not free to look the capitalist affairs openly and freely so, capitalists are not ready to develop the scientific concept in the society rather, they are creating and spreading so many political substance to corrupt the scientific concept to create obstacles to hinder the scientific development of society and science to exist as the capitalist by confusing the working class-the product of the capitalist class but the grave digger of the capitalist class about the fact of capitalist substances i.e. commodity, capital, ownership of capital and capitalist property, capitalist social relation, class and class relation and class struggle etc

**by the politics of the slavery and feudal societies- the useful weapon to convince to believe in faith and fate to live better even by the exploited and ruled classes by caring and obeying the ruling class.**

**Therefore, capitalism is not a science favored, science friendly and science lover society and the capitalist class is not a friendly class of science though the capitalists class have no option except using the science and technology for constantly revolutionizing the instruments of production to exist as a capitalist class therefore, it's the self contradictory stand of both capitalism and capitalist class about science.**

**Science is not a private thing rather science is universal though yet confined by the capitalist class. However, science is working thus, the non-working capitalism of this epoch and its double standard and disabled capitalist class will face defeat by**

**the working condition of science so, not politics, mythologies, ideologies etc but science will win.**

**Marx was a scientist thus, nothing about capitalism and communism is from his brain or communism is not his view or opinion but he thought from the reality of the society – the full grown capitalism. Both Marx and Engels did not write so many things about communism but they wrote some important formulas what they formulated by observing the social facts scientifically and thereby calculating these scientifically as the consequence of capitalism. The manifesto of the communist party, written by both Marx and Engels has described so rightly about the formulation of communist principle as is : “The theoretical conclusions of the communists are in no way based on ideas or principles that have been invented ,or discovered, by this or that would be universal reformer.”- part-2, page 37,**

published by the ICWF, @ [www.icwffreedom.org](http://www.icwffreedom.org) .

And they wrote again in the same book is as: “ The charges against communism made from a religious , a philosophical and generally, from an ideological stand , are not deserving of serious examination.”- part-2, page-48.

Again, the same book has described as is: “ .....; not the interest of the proletariat, but the interest of the human nature, of man in general, who belongs to no class , has no reality , who exists in the misty realm of philosophical fantasy.” – page-60.

Therefore, it's very much clear from the above statements that Marx was not a philosopher or ideologist and thereby, he never produced any ideology what the disciples of Lenin are claiming. So, Marxism is an artificial creation thus, it's a false and bogus but a political

**propaganda to create false impression and misconception among the wage slaves about science and scientist Marx to confuse the working class about their emancipation by communism to protect the decayed capitalism currently in moribund condition.**

**In fact, no society is the brain child of any one or any society is the product of any one by his thought rather, everyone is under the existing conditions of the society to think and do his work by the interest of his own class.**

**Undoubtedly, no one is out of class and class interest in a class divided society. So, everyone is acting and reacting by the interest of his class interest in a class divided society along with capitalism- the last and final class divided society. But, the political bosses of the exploiter ruling classes has been trying for confusing the exploited classes by producing so many**

**ideologies, philosophies , creeds etc to serve the interest of the exploiters by protecting the existing exploitative society but the masters and lords are failed to protect their respective society and thereby, capitalism will not exist finally by the effect of class struggle of the exploited working class.**

**In fact, the outcome of contradiction of the exploiter capitalist class and the exploited working class is communism- a classless-stateless society of uninterrupted peace but working to win nature.**

**History was one of the most important subjects to Marx to investigate it to know the facts for changing the societies of the past but capitalism was the main focus to him to know capital and its power along with role and activities of both the capitalist class and working class; And finally the consequence of capitalism. He sided with the working class therefore, he**

**was not confined by the exploitative interest thus, he was free to look openly thereby he observed and calculated the social affairs openly that is scientifically to formulate and explain these formulas as a scientist.**

**Therefore, Marx has observed, investigated, and inquired the facts of the societies from the reality but not from his brain but he used his brain to think scientifically to observe and analyze the facts what he got from the society. Thereby, he concluded and formulated the code of capital by discovering the secret of capital and the code of society for change by discovering the historical facts scientifically. Noted, the code of creation or change of anything is science.**

**Therefore, socialism is not his opinion or vision or dream or fruit of action of his brain what the disciples of liar and fraud Lenin has been claiming that Marx was**

**an extra-ordinary person and he has produced the so-called Marxism and thereby the USSR was the fruit of action of so-fertile brain of so-called great Marxist Lenin but sorry, they are not only liar but also conceived the political concept of the brutal rulers of the brutal slavery society for marking some are extra-ordinary and others are ordinary to justify and protect the division, disparity and discrimination among the mankind.**

**Sure, capitalism will not exist by the same reason for what both the slavery and feudal society did not exist. In fact, socialism is the historical consequence of capitalism by the consequence of repeated recession – the revolt of the new and newer means of production introduced by the capitalist class against the old social relation of capitalism based on commodity, selling and buying, wage slavery, exploitation, class and class rule but rooted on private property for proper**

**and perfect use of these instruments of production by a new society based on social ownership of the means of production, transportation and communication.**

**Again, socialism is a better society to live thereby Marx was for socialism and thereby he drew a picture of the said better society is not only an utopian concept rather, total ignorance about communist Marx and his discovery- the science of communism or an intentional and ill motivated political propaganda of the politicians to undermine communist Marx to hide the science of communism to protect the so waste capitalism to save the exploiter capitalist class.**

**We the members of the Information Centre For Workers Freedom are for science of communism discovered by Marx and explained by Engels too by rejecting the poisonous Leninism to work**

**to cooperate to rebuild the communist movement to form a communist party- a working class party to unite the workers of the world to fight against the capitalist class to vanish it to end wage slavery to end exploitation to end rule of men by men by abolishing the capitalist mode of production- a production system with a aim to produce capital belongs to capitalist class by the capitalist ownership of property – the ownership of means of production and of exchange by the communist revolution by the working class alone for communism- the most modern scientific society free from commodity, capital, selling and buying, wage slavery, exploitation, class and class rule thus, its free from mythology, creeds, ideology, philosophy, politics, political party, state and all other class weapons but social ownership of the means of production, transportation and communication is the base of communism with a world association of all by the all**

**and for the all of the world to coordinate and communicate the social production and information along with a single one and undivided mankind with full sense of humanity thus, communism is not only a science favored, science friendly and science loving scientific society but also a friendly and lovely society thus, all are not only with a friendly and lovely relation rather, everyone is free to do anything along with love and union in communism so, communism is a society of liberty and freedom of all of the world.**

**All interested are welcome to discuss, share and exchange the views about the findings and conclusion of us about capitalism and communism but on the basis of science of communism to work unitedly to rebuilding the communist movement to form a working class to fight against the exploiter capitalist class to vanish it by vanishing the capitalist ownership of the property for the social**

**ownership of means of production, transportation and communication by the communist revolution by the working class alone for ending selling and buying to end commodity production to vanish capital to vanish wage slavery for ending the exploitation of men by men for the emancipation from the all kind of masters, rulers, leaders, bosses, preceptors and their chains –the rules, customs, cultures, traditions etc, originated from the private property; And all kind of class weapons including working class party.**

**Noted, science ,science and science for freedom is the main slogan of the ICWF. Therefore, know science, realize science, care science and practice science is the motto of the ICWF. Noted, ICWF has declared its stand for the science of communism in its ‘basic concept and rules’.**

**Therefore, ICWF is not for any writing of anyone along with Marx without examining scientifically on the basis of science of communism to support and care.**

**So, ICWF is for the SCIENCE OF COMMUNISM.**
